

a million dreams across America

Introducing “A Million Dreams Across America.”

“[A Million Dreams Across America](#)” is a national movement developed to help reignite the American dream. Designed to educate, inspire and empower people with the dream to start their own business, Dreams Across America is an intensive program that works for anyone, from those with an idea to the experienced serial entrepreneur, by creating an action plan for turning dreams into reality. With an economy under fire, foreclosure rates at an all time high, retirements in jeopardy and college graduates stunned by a stonewalled Fortune 500 set, starting your own business, localizing your economy and taking control of your livelihood has never been more important to the health and wellbeing of us all. The facilitators of Dreams Across America are not politicians. We are leaders impacting a grass-roots movement to innovate a new country.

A nationwide program to impact, INSPIRE and empower DREAMERS.

Over the course of the coming year, “A Million Dreams Across America” will visit 25 cities across the country setting up intensive, day-long events where aspiring entrepreneurs will get the foundation and action plan along with follow on guidance and support needed to launch their business. Each day-long event will have approximately 300 participants in attendance. The goal is not to talk about the dream of owning a business, but rather to give specific tools and instruction to make it happen. In each city a mentoring program will be developed so that the local entrepreneurs have a network/community to work with them and support their growth, both short and long term. After completing the program, at least one entrepreneur/market with a strong, market-ready idea will be awarded one of the \$5-\$25,000 grants to help seed their business.

How can you help?

Hands-on advice and instruction is at the core of the program. With that in mind, we are currently assembling the local panel of experts from across business disciplines to provide council to participating entrepreneurs in your region. We lay the foundation together, we build the support system to guide entrepreneurs along their path and we create unstoppable communities to build sustainable success. We are reaching out to companies that provide products and services to small businesses to volunteer time and resources to be a part of the panel. This is an excellent opportunity for companies offering financial services, telecommunications services, software, hardware, human resources solutions, and sales force training to connect with entrepreneurs in a meaningful way and at the start of their endeavor when most purchases and partnership commitments are formed.
